

Getting My QEEG

I think it will be fun!

First I will sit on the chair.
Or I can sit on
mommy's lap if I want to.

Then I get to watch a
movie for a while.

The man will put a funny looking cap on my head.

It might feel a little tight,
but after a while it will feel ok.

It is very important that I don't touch
the cap or touch my ears.

The man will squirt some liquid into the holes in the cap.

It may feel wet
but it won't hurt.

I can watch the movie
while this is happening.

The man will tell me when he is
ready to record my QEEG.

I will try to sit very still and
keep my eyes looking
at the spot he shows me.

Then its time for me to close my eyes. I can keep my eyes closed even when I am awake.

I will try to keep my eyes still
when my eyes are closed.

If this is hard, a grownup
can lightly touch my eyelids.
Then I will feel if I am moving my eyes.

It might feel a little funny,
but it won't hurt.

I will try to remember not to touch the funny cap.

I will try to sit very still
and keep my eyes still.

Once we're done the man
will take the cap off.

Then he will clean my
hair a little bit.

Then I am done!

Everyone will be very happy that I
did a good job.

My QEEG. I did it!
It was fun.
